DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I, claims 1-26, drawn to the mounting platform of a motor, classified in class 310, subclass 91.

Group II, claims 27 and 28, drawn to the brush holder assembly, classified in class 310, subclass 239.

Group III, claims 29-33, drawn to the method of making a brush holder for a motor, classified in class 29, subclass 596.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions of group III and groups I to II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, that the process as claimed can be used to make other and materially different product such as car alternator.

Inventions of group I and group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed

does not require the particulars of the subcombination as claimed because the combination (group I) does not require the wire or the spring. The subcombination (group II) has separate utility such as the terminal in contact with the wire.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I which is mounting platform for the motor is not required for Group II to III, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Attorney Thomas Ring, Reg. No. 29,971 on 5/30/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
